

Flush pressure transmitter

For viscous and solids-containing media

Model S-11

WIKA data sheet PE 81.02

Applications

- Machine building
- Hydraulic aggregates
- General industrial applications
- Food and beverage industry

Special features

- High-quality product
- Many configurations possible
- Flush process connection
- Large stocks for short delivery times
- Vacuum-tight

Description

Specialist for viscous and solids-containing media

The model S-11 pressure transmitter with flush diaphragm has been specifically designed for the measurement of viscous, paste-like, adhesive, crystallising, particle-laden and contaminated media, which would clog the pressure channel of conventional process connections.

Through its optimised design, the flush process connection enables the cleanability of the wetted diaphragm to be integrated into the process. Low-maintenance and trouble-free pressure measurement is thus also guaranteed in critical applications with frequently changing media.

High accuracy, a robust design, high-quality workmanship and the high flexibility of configuration are key features of the model S-11.

Flush process connection

All process connections of the flush pressure transmitter are made of stainless steel, all welded and isolate the process medium from the pressure measuring instrument via a positive seal. A reliable, dead-space free sealing between the process connection and the measuring medium is thus assured.

For high medium temperatures of up to 150 °C (302 °F), the pressure transmitter is also available with an integrated cooling element.

Specifically for the food and beverage industry, a version with internal system fill fluid in accordance with FDA 21 CFR 178.3750 can be chosen.

Accuracy data

Accuracy at reference conditions

Standard	≤ ±0.5 % of span
Option	≤ ±0.25 % of span ¹⁾

¹⁾ Only for measuring ranges ≥ 0.25 bar

Including non-linearity, hysteresis, zero offset and end value deviation (corresponds to measured error per IEC 61298-2). Calibrated in vertical mounting position with process connection facing downwards.

Non-linearity (per IEC 61298-2)

≤ ±0.2 % of span BFSL

Non-repeatability

≤ ±0.1 % of span

Temperature error in rated temperature range

Rated temperature range:

0 ... 80 °C (32 ... 176 °F)

Mean temperature coefficient of zero point:

Measuring range > 0.25 bar ≤ 0.2 % of span/10 K

Measuring range ≤ 0.25 bar < 0.4 % of span/10 K

Mean temperature coefficient of span:

≤ 0.2 % of span/10 K

Long-term drift

≤ ±0.2 % of span/year

Adjustability of zero point and span

Adjustment is made using potentiometers inside the instrument.

Not possible for cable outlet with ingress protection IP 68.

Zero point ± 5 %

Span ± 5 %

Time response

Settling time

≤ 10 ms

Operating conditions

Ingress protection (per IEC 60529)

The ingress protection depends on the type of electrical connection.

Electrical connection	Ingress protection
Angular connector DIN 175301-803 A	IP 65
Circular connector M12 x 1 (4-pin)	IP 67
Cable outlet	
■ Standard	IP 67
■ Option	IP 68 ²⁾

2) Adjustability of zero point and span not possible.

The stated ingress protection only applies when plugged in using mating connectors that have the appropriate ingress protection.

Vibration resistance

Process connections without cooling element:
